

MOTE

Mote has been designed to provide a holistic solution when designing dynamic environments. Created as a complete lounge seating range, no detail is an afterthought, with every inch having been given careful consideration to eliminate

dead space. The Mote family includes sofas, ottomans, screens and accessories, each linking seamlessly to each other to create a combination of rectilinear and curvilinear forms for beautiful yet defined spaces.

DESIGN

Senator

Our team of talented in house designers are responsible for creating elegant, innovative furniture designs which not only look beautiful, but minimise the impact on the world around us.

They come from all over the world, but are based in our Design Center located in a quiet Lancashire village just outside the Ribble Valley. Our dedicated facility is over three floors which include studios, a materials test center and prototyping lab.

SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

While recycling is the element which

receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.
